

The Wilms® Nature Shower (GFPa-*)

Pure Health and Wellness

For an entirely new and invigorating shower experience, use the Wilms Ancient Forest Shower.

The shower water flows through a pine heartwood mesh filter allowing the over 80 natural ingredients of pine heartwood to enter the water.

- The germ-reducing and highly effective ingredients of the wood are absorbed by warm, absorbant skin, thereby strengthening the skin's natural protective barrier. (Appraisal University of Greifswald is present.)
- The pleasant water vapor contains the ideal ingredients to soothe colds and respiratory problems.
- Shower and bath surfaces are protected by the wood extract. Results:
 - Unique, natural bath environment;
 - The ingredients enter the air as the water evaporates, reducing fungi in every nook and cranny.
- For an efficient effect to the skin the filter should be activated after the usual shower procedure.
- Easy filter replacement.
- Various possible natural ingredient combinations.
- Environmentally friendly disposal/no environmentally harmful substances in the water.
- Easy installation without structural modifications.
- The positive effects on Legionella and calcium deposits in the shower head are currently being studied.
- The shower insert can also be created with additional customized ingredients for different effects.

Functional model (GFPa-*)

Creates a new world in your bathroom!
