

Wilms® Bed Mat

Enjoy a deeper, healthier sleep

The Wilms® Hygienic Wood Bed Mat is a type of mattress cover containing the bacterial- and mite-reducing materials of pine heartwood. These ingredients have also shown to aid in a deeper, healthier sleep. The Bed Mat is made of pine heartwood and zirbe wood. It is proven to improve sleep quality and reduce allergy symptoms.

- **Alleviates sleep disorders**

due to calming effect of ingredients of pine heartwood

- **Reduced quantity of mites**

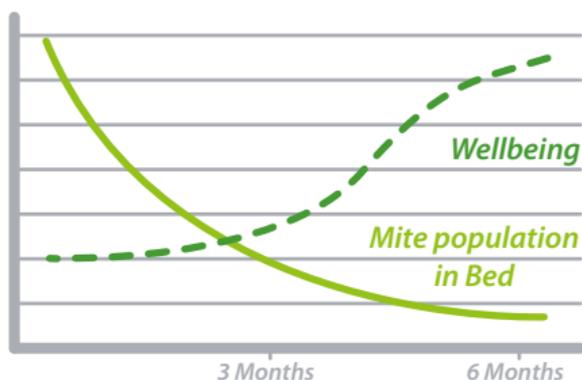

Fewer allergy symptoms due to creation of an unfavorable environment for mites

- **Thermal adjustment - Less sweating**

due to absorption of moisture into the wood

From the Research:

80% Less mites! Less allergy symptoms!

Research: 32 allergy sufferer | 6 months of test period
University Greifswald 2009/2010

Wilms® Bed Mat

Against Allergies.

Allergies are often relieved through the elimination of mites in bed. Mites live inside the mattress. When we enter the bed, they are attracted to the warmth of our bodies. As they detect the difference in temperature, they leave the mattress and go through the sheet to reach our skin. Wilms Hygienic Wood Mats are used directly on top of the mattress and are unpenetrable by the mites. The use of the mats by allergy sufferers allows for a thorough night of sleep leaving you completely refreshed.

Types and Application

Standard Bed Mat

The six Hygienic Wood Mat inserts are in one large hemp sleeve where they each have a separate compartment.

Premium Bed Mat

The four Hygienic Wood Mat inserts are individually covered and then put into a high quality sleeve. These individually covered mats can then be changed. The replacement mats are called Universal Mats and are available in packages of two.

Standard Bed Mat with Hemp Cover

Easy to handle - for all Sizes

The mats are a type of mattress cover which are just beneath the bottom sheet. They are held in place by the Elastic Fastening Clips that are included in the package. The mats are available in all sizes.
