

It Works!
Fresh. Pure.
Naturally hygienic.

Wilms® Bath Mat

Healthy feet on pine heartwood.

The Wilms® Hygienic Wood Bath Mat creates a naturally hygienic bathroom, therefore advancing health and well-being. The natural, effective ingredients of the pure pine heartwood chippings are germ-, bacteria- and fungi reducing. Because of this, the Wilms® Hygienic Wood Bath Mat has the ability to reduce foot fungus 100% naturally, without any chemicals or other additives.

- **Naturally effective against causative organisms**
- such as those associated with foot fungus
- **Dry feet** – due to moisture-absorbing wood chips
- **Absolutely anti-slip** – due to its unique covering

Tested and confirmed

A study by the German research institute Hygiene Nord investigated to what extent the Wilms® Hygienic Wood Bath Mat can be used as a preventative measure against foot fungus in private and public use.

Result: The mat proved to be 90% to 99% effective in eliminating typical foot fungus. Further tests confirmed the extraordinary effect of Wilms® Hygienic Wood.

"... depending on the type, 90% - 99% of fungi were killed..."
Institute Hygiene Nord

"... particularly significant is the rapid destruction (2 hours) of all micro-organisms by Hygienic Wood, while other materials still had bacteria after 120 hours (polyethylene after 216 hours)..."
Federal Biological Research Center for Agriculture and Forestry

Small Chips - Big Results

The Bath Mat consists of tiny wood chips which are pressed onto a base material. The number of chips in this form creates an extremely large surface for a quick, easy and effective absorption and elimination of germs and bacteria. The covering allows air and moisture to pass through, which supports the effect of the mat.

Application:

The Wilms® Hygienic Wood Bath Mat is designed to be used in front of the shower, bathtub or sink...

Care Tips:

Since the mats are naturally antibacterial, they do not need to be cleaned. If you would still like to clean your mat, we suggest doing it with a damp rag.

After use, you can leave your mat on the floor to dry. It is a natural product that dries quickly. If your bathroom floor is heated from below, the mat dries even faster.
